Profile Summary

Webflow Developer & Web Designer with 4+ years of experience building high-performance, conversion-focused websites for SaaS and tech-driven businesses. Specialized in translating Figma designs into scalable, cleanly structured Webflow builds with strong CMS architecture and optimized performance.

Experienced in building scalable CMS structures, optimizing site performance, and integrating third-party tools for marketing and automation.

Skills

- **Webflow Development:** CMS architecture, responsive design, interactions, performance optimization, SEO-safe migrations
- **Technical:** HTML, CSS, JavaScript, custom code implementation, structured On-Page SEO
- **Performance & Optimization:** Core Web Vitals improvements, clean structure, lightweight builds
- **Integrations:** Third-party tools, analytics, tracking, form systems, automation workflows
- **Design Implementation:** Figma-to-Webflow builds, layout systems, visual hierarchy, scalable structure
- **Website Architecture & Project Delivery:** Client communication, scope definition, feedback handling, end-to-end delivery
